

Dear Sirs;-I would like to comment regarding BPL proceeding # 03-104
I would request in the strongest possible terms that this proposal to
send control/information signals over power lines be dismissed.- The HF and to a
greater extent, the LF bands, are already polluted to
the point where LF is nearly unusable, and HF is sure to follow if this idea is
implemented. The HF amateur bands are one of this
country's greatest assets, and in these troubled times are more
likely to remain so.. I urge you to dismiss this proposal at once,
Thank You, James W. White Jr.
